Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 26 March 2007.
- 2a) This action is **FINAL**. 2b) This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, and 5 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dragone et al. (US 5,373,582). Dragone et al. (hereinafter Dragone) discloses a body armor system including a front chest ballistic section (34), a rear back ballistic section (49) and a pair of flexible right and left shoulder straps (14, 15) which are hidden partially within an outer shell (36) and extends through passages (40,41), col. 5, lines 1-10 and as shown in figure 5. Further, each of the left and right shoulder straps extending through the respective passages are directly stitched to a ballistic panel (37) as shown in figure 5. Also, the ballistic panel is removable inserted through a slit in a bottom of the front protective section having a separable fastener (48) as shown in figure 6. A cumber band is attached to an inside of the outer shell, col. 5, lines 43-57 and as shown in figure 9. Furthermore, the front protective section includes a stabilizer tab being directly sewn to the ballistic panel having substantially no seams or attachment points on an outer surface thereof as shown in figure 10.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 6-7 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dragone.

With regard to claims 2, 6-7 and 13, it would have been obvious to one skilled in the art at the time the invention was made to substitute the separable fastener (48) of Dragone being hidden by the front protective section (figure 6) with either, snaps, zipper, hook and loop, etc, since such fastening means is considered equivalent in the art.

Response to Amendment

5. The amendment and arguments filed on March 26, 2007 has been considered. In view of such this office action is being made FINAL. The Applicant argues that Dragone '582 does not show adjustability within the outer shell shoulder area and the single shoulder strap on each of the left and right shoulders. The Examiner respectfully disagrees since Dragone '582 does disclose flexible right and left shoulder straps (14, 15) which are hidden partially within an outer shell (36) and extends through passages (40,41), col. 5, lines 1-10 in combination with a stabilizer tab as shown in figures 5 and 10, respectively.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
